Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Graffin' 888.

The Graffin reference discloses a rotary weight filler with associated first and second operational modes (see col. 4, lines 30-65 and particularly lines 41-47)

In regard to claims 6-8, the initiation of a filling operation as well as stabilization of a supplied vessel would be implicit during normal use and operation.

Conclusion

Art Unit: 3751

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Graffin'841 &'689, and Kohashi et al. references pertain to rotary fillers with associated weighing.
